Forecast for Sunday 04 Apr 2021

Weather: Dry and chilly to start Sunday, with a risk of some short lived shallow fog patches in the valleys around dawn. Remaining dry with largely clear skies through daylight hours, then clouding over mid-evening onwards with patchy hill fog developing.

Chance of cloud free mountain/hill tops above 600m: 95% or better during the day, but falling to 60% mid evening onwards.

Visibility: Locally poor in any valley fog patches around dawn, otherwise generally very good or excellent during the day. Remaining generally good at low levels in the evening, but with patchy cloud developing on slopes above 700m.

Forecast for Monday 05 Apr 2021

Weather: Outbreaks of rain with snow above 800m will arrive shortly after midnight, then will clear during the early hours, being followed by clearer but much colder conditions with a few snow showers. The showers will fade soon after dawn with the rest of the morning and much of the afternoon remaining largely dry. Isolated snow or hail showers are to develop towards the evening, but they will move through quickly on the strong winds.

Maximum wind: North to northwest 30mph gust 40mph.

Chance of cloud free mountain/hill tops above 600m: 20% or less at first, improving to 90% or better by dawn. Falling to 60% late afternoon and evening as snow or hail showers move through.

Visibility: Quickly becoming poor in rain and hill snow with cloud on slopes above 500-600m. Improving to generally good during the early hours as cloud lifts and breaks to leave only patches around 800m. Sudden large deteriorations in any snow and hail showers late afternoon and evening with cloud base temporarily lowering to 600-700m.

Temperature: **Valleys:** Minus 1 Celsius becoming plus 5 Celsius.
At 600m: Plus 4 Celsius becoming minus 3 Celsius.
Freezing level: 1000m falling to all levels by dawn, though lifting to 300m in the afternoon away from snow showers.
